SUMMARY

Fresh graduate of D3 Computer Technology at Institut Teknologi Del (GPA 3.31/4.00), focused on full-stack and backend development with a growing interest in DevOps. Built a real-time website monitoring platform with Go, React, and PostgreSQL during a six-month IT internship at PT Pelindo Multi Terminal, and a procurement portal with Django REST Framework, React + TypeScript, and AWS CDK. A fast learner who works well in a team.

EDUCATION

Institut Teknologi Del - **Toba, North Sumatra, Indonesia** *Aug 2023 - Sep 2026*
Diploma (D3) in Computer Technology – Cumulative GPA: 3.31/4.00
Final Project – *IoT-Based Monitoring and Control System for Optimizing Coffee Fermentation*

INTERNSHIP EXPERIENCE

PT Pelindo Multi Terminal - **Belawan, North Sumatra** *Feb 2026 - Jul 2026*
IT Intern – Junior Developer

- Developed a real-time website monitoring control panel using Go (chi), React, and PostgreSQL, checking DNS, ICMP, TCP, TLS/SSL, HTTP status, and response time.
- Implemented scheduled health checks with a goroutine worker pool and live status updates via WebSocket.
- Integrated Telegram and email notification workflows with anti-flapping logic to reduce false alarms.
- Added JWT authentication with role-based access (Viewer, Admin, Superadmin) and Prometheus metrics.

PROJECTS

Lucky Mart Procurement Portal *Oct 2026*
Full-Stack Developer (Personal Project) – github.com/LuckySiagian/lucky-mart-procurement

- Built a purchase-order approval portal for the family store with Django REST Framework, PostgreSQL, and React + TypeScript, integrated with the Lucky Mart API for low-stock suggestions and stock-in sync.
- Added JWT and Amazon Cognito authentication, 87 automated tests in GitHub Actions CI, Prometheus/Grafana monitoring, and AWS infrastructure as code with AWS CDK (written and tested, not yet deployed).

Lucky Mart – Grocery Ordering Platform *2026 - Present*
Full-Stack Developer (Personal Project)

- Developing an ordering platform for my family's grocery store: a customer web store and an admin dashboard in React + TypeScript on a Go (Gin) and PostgreSQL backend with 80+ JWT-secured REST API endpoints.

IoT Coffee Fermentation Monitoring & Control System *2026*
Thesis Project – Team Member

- Worked on ESP32 firmware for temperature, humidity, and pH sensors, relays, and MQTT; calibrated the sensors and helped integrate the device with Node-RED and a Flutter app.

Other Projects *2023 - 2024*

- **Ijabu Coffee Shop** e-commerce (Laravel, MySQL); **Inventory & Borrowing System**; **Toyota** company profile (WordPress).

SKILLS

- **Programming:** Go, Python, JavaScript, TypeScript, PHP, HTML, CSS
- **Frontend:** React, Vite, TanStack Query, Tailwind CSS
- **Backend & API:** Go (chi, Gin), Django REST Framework, Laravel, Node.js, REST API, WebSocket, JWT Authentication
- **Database:** PostgreSQL, MySQL
- **DevOps & Tools:** Docker, Docker Compose, GitHub Actions, AWS CDK (learning), Linux/CLI, Git, GitHub, Bitbucket
- **Monitoring & IoT:** Prometheus, Grafana, Telegram Bot API, SMTP Email Alerts, MQTT, ESP32

CERTIFICATIONS & LEADERSHIP

- **PT Pelindo Multi Terminal (2026):** Internship Certificate – "Very Good" result, average score 94.35/100.
- **Institut Teknologi Del (2025):** Student Leadership Program 2024/2025.
- **Member, Department of Sports, BEM Institut Teknologi Del (Nov 2024 – Nov 2025):** organized 5+ sports events involving 200+ students with 8 committee members.
- **Mentor, New Student Mentorship Program (Aug 2024 – Sep 2025):** mentored 10+ freshmen on study habits, time management, and campus life.
