SUMMARY

Fresh graduate of D3 Computer Technology at Institut Teknologi Del (GPA 3.31/4.00), focused on full-stack and backend development with a growing interest in DevOps. During a six-month IT internship at PT Pelindo Multi Terminal, built a real-time website monitoring platform with Go, React, and PostgreSQL. Experienced in REST APIs, WebSocket, JWT authentication, and Docker-based development environments; a fast learner who works well in a team.

EDUCATION

Institut Teknologi Del - Toba, North Sumatra, Indonesia

Aug 2023 - Sep 2026

Diploma (D3) in Computer Technology – Cumulative GPA: 3.31/4.00

Final Project – *IoT-Based Monitoring and Control System for Optimizing Coffee Fermentation*

INTERNSHIP EXPERIENCE

PT Pelindo Multi Terminal - Belawan, North Sumatra

Feb 2026 - Jul 2026

IT Intern – Junior Developer

- Developed a real-time website monitoring control panel using Go (chi), React, and PostgreSQL, checking DNS, ICMP, TCP, TLS/SSL, HTTP status, and response time.
- Implemented scheduled health checks with a goroutine worker pool and live status updates via WebSocket.
- Integrated Telegram and email notification workflows with anti-flapping logic to reduce false alarms.
- Added JWT authentication with role-based access (Viewer, Admin, Superadmin) and Prometheus metrics.
- Completed the internship with a "Very Good" result (average score 94.35/100).

PROJECTS

Lucky Mart – Grocery Ordering Platform

2026 - Present

Full-Stack Developer (Personal Project)

- Developing a full-stack ordering platform for my family's grocery store, with a customer web store and an admin dashboard in React + TypeScript on a Go (Gin) and PostgreSQL backend.
- Built 80+ REST API endpoints for products, inventory, cart, checkout, orders, shipping, payments, and customer credit, secured with JWT and run locally with Docker Compose.

IoT Coffee Fermentation Monitoring & Control System

2026

Thesis Project – Team Member

- Worked on ESP32 firmware to read temperature, humidity, and pH sensors, drive relays, and publish data over MQTT.
- Calibrated the sensors against reference instruments and helped integrate the device with Node-RED and a Flutter app.

Other Projects

2023 - 2024

- E-Commerce Website – Ijabu Coffee Shop (2024):** product catalog, cart, orders, and admin dashboard (Laravel, MySQL).
- Inventory & Borrowing System (2024):** lab equipment loan app with authentication and activity logs.
- Toyota Company Profile Website (2023):** responsive company profile built with WordPress.

SKILLS

- Programming:** Go, JavaScript, TypeScript, PHP, HTML, CSS
- Frontend:** React, Vite, Tailwind CSS
- Backend & API:** Go (chi, Gin), Laravel, Node.js, REST API, WebSocket, JWT Authentication
- Database:** PostgreSQL, MySQL
- DevOps & Tools:** Docker, Docker Compose, Linux/CLI, Git, GitHub, Bitbucket
- Monitoring & IoT:** Prometheus, Telegram Bot API, SMTP Email Alerts, MQTT, ESP32

CERTIFICATIONS & LEADERSHIP

- PT Pelindo Multi Terminal (2026):** Internship Certificate – "Very Good" result, average score 94.35/100.
- Institut Teknologi Del (2025):** Student Leadership Program 2024/2025.
- Member, Department of Sports, BEM Institut Teknologi Del (Nov 2024 – Nov 2025):** organized 5+ sports events involving 200+ students with 8 committee members.
- Mentor, New Student Mentorship Program (Aug 2024 – Sep 2025):** mentored 10+ freshmen on study habits, time management, and campus life.
